

Measure, process, optimize,
and protect your website.
Tirelessly, 24/7

We work with only the best

Your website
fast and safe,
even internet outage

<https://mlytics.com/>

What makes mlytics special?

Maximize website availability

Say good-bye to downtime

Prevent downtime for your website, keep the operations running while others are panicking.

Stop malicious bot

Go home, bad bots

Accurately identify and stop bad bots with mlytics's rich and ever-updating threat database.

DDoS Protection

All layers, always protected

Protect against L3, L4, and L7 DDoS attacks of all sizes effectively without sacrificing performance.

China access

Simplifying China content delivery

Deliver your website content without ICP license and improve performance in China.

How it works?

Multi CDN

Fusing top-tier CDNs into a perfect one

The easiest and most affordable way to subscribe and use multiple CDNs, no contract required.

Pulse

Know which CDN outperforms

See real-time CDN availability and performance data, learn what's happening on the internet.

Access Control

Whitelisting and blacklisting, centralized and simplified

Enables full control over traffic access via CIDR/IP and geolocation attributes.

AI Load Balancing

Finding the best route between your users and website

The system can predict which CDN performs the best in any location and make the swap for you.

Web Application Firewall

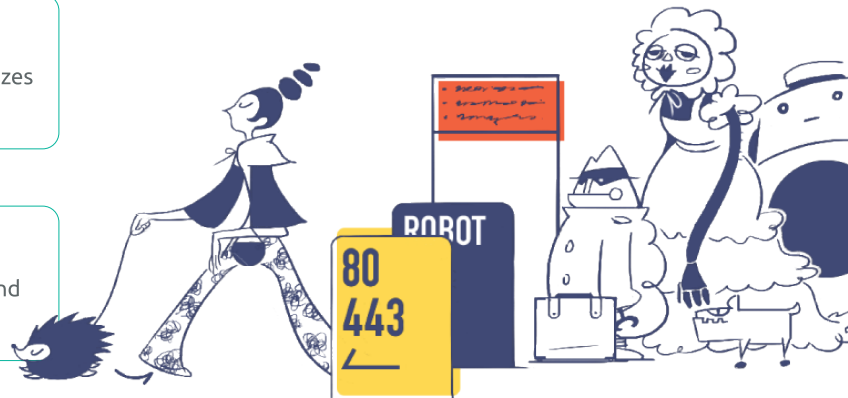

Web application vulnerabilities, no longer

Protect against vulnerabilities such as injection attacks, and XSS without changing your website's infrastructure.

Free SSL

Keep website encrypted, get a free SSL

Generate a free SSL certificate and HTTPS-encrypt your website, or upload your own.
